

Flying Geese – Single Geese – measurements listed are a little larger to be trimmed to size

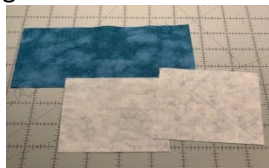

For each Flying Geese you need 3 pieces of fabric – A rectangle plus 2 squares

To determine the size your pattern calls for – **rule of thumb is: add half inch larger to fabric pieces**

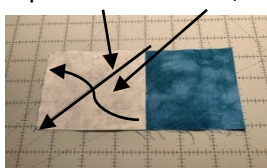

For example: if your finished Flying Geese is to be 3 x 6 - cut (1) 3 ½ x 6 ½" and (2) 3 ½" Squares

Take your 2 smaller squares and draw a diagonal line down the middle - then place one square on the rectangle making sure the line you drew is placed as shown – sew a scant stitch down that line, flip the half square up to meet the top end (they should line up) then trim the 2 bottom pieces ¼" from sewn line & press.

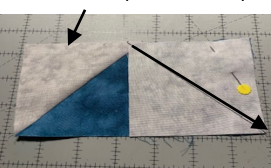

Take your 2nd square and place on the other side and stitch on the line – pay attention to placement. Press as you did on the first side and trim the bottom pieces to form your geese. Trim to size making sure the top of the geese has ¼ inch at the top.

First side & added 2nd square
Top is ¼"

2nd piece sewn & trimmed

Back side of completed geese

Trim to size - Finished flying geese

Flying Geese – Make Four at a time – measurements listed are a little larger to be trimmed to size

For making four Flying Geese at a time you need (1) large square and (4) smaller squares.

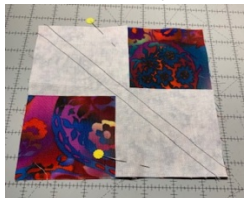

Rule of thumb is: Cut your large square 1 ¼" larger & your small squares 7/8" larger than finished size

For example: to make (4) 3x6" geese - cut (1) large square 7 ¼" and (4) small squares 3-7/8"

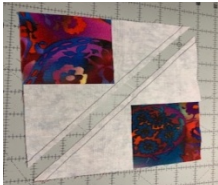

Take your small squares and draw a diagonal line down the middle then place 2 squares on each corner of the large square – sew ¼" from that drawn line on both sides. Cut on that line you drew – press the small pieces (looks like a heart) open (you will have 2) – place the next square on the corner of one of the hearts then sew ¼" from that drawn line and cut, do the same for the next one, press and trim to size.
